

Questel's Workshop: News from Orbit Intelligence and Variant Analysis with OBS

Abstract:

We will give an overview of Orbit Intelligence new features and will demonstrate Orbit BioSequence's new Variant analysis interface which allows one to analyze, view, manipulate variations across multiple sequence results altogether.

Presenter:

Fanny Coignard

Fanny Coignard has a biotechnology engineer degree (MSc) from the E.S.B.S. (Strasbourg University) and has joined Questel in 2019 as a Subject Matter Expert, specialized in IP tools, including Orbit Intelligence, Orbit Insight and Orbit Asset. Before joining Questel, Fanny worked as a Patent Information Specialist at Pfizer for almost 15 years. Fanny was specialized in biotechnology related patent questions, including sequence analysis. She also worked as a research scientist for 6 years at British Biotech (Oxford, U.K.), Epigene (Paris, France) and Exonhit Therapeutics (Paris, France) where she gained experience in molecular biology, cell biology, bioinformatics, and proteomics.
